Hydrocarbures responsables **Récupération améliorée (EOR)**

19 - 21 septembre 2022

19-21 September 2022
IFPEN (near Paris) - France

Following the very positive feedback from participants on the previous editions and their wish for an event held every two years, IFPEN is proud to announce the **5th edition of the EOR Workshop** at Rueil-Malmaison, near Paris (France) from **19 to 21 September 2022.**

IFPEN's EOR Workshop is a **forum for sharing and discussing ideas on the technical and industrial challenges of implementing EOR in the field.** Its scope covers **initial feasibility assessments, case studies and feedback from field trials.**

In its 5th edition since 2013, the workshop will cover the **challenges of modern EOR** and address the question of its immediate and medium-term future in the current energy landscape: are we or are we not at the **dawn of a golden age of EOR at last?**

Meet your peers in-person within a safe and secure environment!
